Riverbend Sustainability Policy

Version 3.1, effective 1 January 2026

Fictional document prepared for a classroom evaluation of NotebookLM. Riverbend Corporate Campus does not exist.

1. Purpose

1.1 This policy sets Riverbend Corporate Campus's commitments on water, energy, waste, accessibility and governance. It applies to all staff, contractors and visitors across Buildings A, B and C.

2. Commitments

2.1 Water. Riverbend will reduce total water use by 15% by the end of 2028, measured against the 2024 baseline.

2.2 Water leaks. A water leak reported through the Green Incident Reporter must be repaired within 24 hours of the report.

2.3 Energy. Riverbend will source 60% of its electricity from renewable sources by the end of 2027 and 100% by 2030.

2.4 Waste. Riverbend will achieve a landfill diversion rate of at least 70% by the end of 2028. Recycling bins will be audited for contamination every month.

2.5 Emissions from suppliers and travel (Scope 3). No target is currently set. A target will be considered at the 2028 policy review.

2.6 Accessibility. Accessible entrances and paths must stay unobstructed. A blocked accessible route is treated as a high-priority incident.

3. Governance

3.1 Accountability. The Head of Facilities is the accountable officer for this policy. The Sustainability Committee meets every quarter and reports to the board twice a year.

3.2 Privacy. Incident reports collect the incident type and the building only. Personal information is not requested unless the person chooses to give it.

3.3 Review. This policy is reviewed every two years.
