Riverbend Supplier Code of Conduct

Version 2.0

Fictional document prepared for a classroom evaluation of NotebookLM. Riverbend Corporate Campus does not exist.

1. Scope. This code applies to every supplier with an annual contract value above A$50,000.

2. Reporting. Suppliers must report their annual energy use and waste volumes to Riverbend by 31 March each year.

3. Standards. Suppliers must follow all labour and environmental laws that apply to them. Forced labour is never acceptable.

4. Breaches. If a supplier breaches this code, it has 30 days to submit a remediation plan. A second breach within 12 months may lead to suspension from the approved supplier list.

5. Audits. Riverbend may audit a supplier after giving 14 days' notice.

6. Raising concerns. Staff can raise a concern about a supplier with the Procurement team. Anonymous reports are accepted through the governance hotline.

7. Certification. Riverbend prefers suppliers with a recognised environmental management certification, such as ISO 14001, but does not require one.
